Pavandeep B.

Software & Product Engineering · AI-Powered Applications

pavandeep.net@gmail.com · linkedin.com/in/pavandeepb · github.com/pavandeepb

SUMMARY

Information Science & Engineering graduate with hands-on experience in web application development, functional testing, API validation, debugging, and technical documentation. Comfortable moving between building a feature, testing its behaviour, and documenting what changed. Interested in reliable software products and AI-powered applications.

EXPERIENCE

Product R&D — Prototype Engagement

Ongoing

Confidential startup · Early-stage product prototype · Details private

- Supporting product functionality and interface behaviour in an early-stage prototype.
- Testing implemented flows, reproducing issues, and documenting expected versus actual behaviour.
- Assisting with debugging, verification, and technical documentation.

Full Stack Developer Intern

Jan 2026 — May 2026

SuprMentr Technologies Pvt. Ltd. · Bengaluru, India

- Worked with React.js, Node.js, Express.js, and MongoDB across application features.
- Tested application functionality and REST APIs.
- Reproduced and documented technical issues.
- Performed API and database validation using Postman and related tools.
- Assisted with debugging, fix verification, and technical documentation.

PROJECTS

Potato Disease Detection System Using ViT — Python, PyTorch, Hugging Face Transformers, Vision Transformer, Flask, ReportLab. Web application that classifies potato leaf images as healthy, early blight, or late blight, with batch analysis and PDF/CSV report export.

Coder-LLM — Python, PyTorch, Hugging Face tokenizers, Accelerate. GPT-style decoder-only code model (~42M parameters) trained from scratch with Fill-in-the-Middle training, a custom BPE tokenizer, and a generation CLI.

RAG Telecom Chatbot — Python, LangChain, ChromaDB, sentence-transformers, Streamlit. Multi-source retrieval over FAQ entries, resolved tickets, and a guide PDF to ground Qwen3-32B answers; Streamlit chat and CLI.

SKILLS

Programming: Python, JavaScript, basic Java

Frontend & backend: HTML, CSS, React.js, Node.js, Express.js

Testing & APIs: Functional testing, regression testing, REST APIs, Postman, debugging, issue reproduction, validation

Databases: SQL, DBMS, MongoDB

Data tools: Microsoft Excel, Power BI

Tools & systems: Git, GitHub, basic Linux, Microsoft Office

AI/ML: Python-based machine learning projects, transformer & LLM training fundamentals (PyTorch), retrieval-augmented generation, computer vision

EDUCATION

B.E. Information Science & Engineering
Bapuji Institute of Engineering & Technology · CGPA 7.67 / 10
2022 — 2026 · PUC 2019 — 2021

PUC Science (PCMB)
Vision PU College

CERTIFICATIONS & COURSEWORK

AI/ML for Geodata Analytics — ISRO / IIRS · AWS Cloud Practitioner Essentials — Amazon Web Services · Microsoft Power BI — Microsoft

Credential dates and verification links are added once confirmed.
